

## Company Profile

Fire Serve is an established participant in the Smoke and Fire industry. Since inception, Fire Serve has progressed rapidly, immediately acquiring the rights to represent BLE Smoke and Fire Curtains in the Southern African market. We are proud to be associated with BLE, a world leading manufacturer and supplier of EN compliant smoke and fire curtains.

Apart from the vast experience of the BLE team, Fire Serve brings 43 years of dedicated local experience in the design and supply of compliant rational Smoke and Fire designs. Providing the requisite level of compliance and safety in the ventilation industry. The unique challenges the industry presents are well served by 74 years of supply chain and construction industry experience in our team.

Fire Serve have an established their relationship with KINGSPAN, founded in 1966, allowing access to the vast range of Kingspan's innovative and unique environmentally friendly products tailored for your smoke control and risk management needs. This allows Fire Serve to translate 55 years of product development to your doorstep in Southern Africa.

The market has long required an independent supplier of innovative yet compliant smoke and fire engineering products and services, not tied to any specific manufacturer and installation supplier. This independence would allow each industry stakeholder equal opportunity to access products, services and technical expertise leading to more informed decision making; Fire Serve is that supplier. To view our comprehensive product range visit: <https://www.fireserve.co.za/product-offering/>

Fire Serve provide a CFD modelling service to evaluate the performance of your design, providing flow patterns, dead spot identification, average age of air in the fire zone, velocity vectors, smoke temperature and fresh air pathways. This allows the designer to prove the functionality of their design. For more detail on the design services offered visit: <https://www.fireserve.co.za/design-solutions/>

We actively participate in, SAIRAC (South African institution of Refrigeration and Air conditioning), ALSA, (Association of Life Safety Assessors) and SAIMEchE (The South African Institution of Mechanical Engineers). Fire Serve are actively reinvesting through sharing knowledge in industry specific presentations related to smoke ventilation systems.

## Ron Burns

Date of birth	: August 1966
Qualifications	: N5 Mechanical Engineering
Career	: '87 – '17 Improvair (Pty) Ltd; FWB; D&O; Mavuka Engineering; RVI
	: 2017 – <b>Fire Serve (Pty) Ltd.</b> Founder, Managing Director
Associations	: <b>SAIRAC (KZN)</b> Chair 2001 – 2008; Membership Category: Fellow <b>SANS Work Group 2</b> (SANS 10400: 2011 Part T) 2013-2015 <b>ASHRAE</b> Chair - Fire and related technologies. 2018 - 2020
Presentations	: Smoke Ventilation presentations are part of our regular offering. Since 2008 we have circa 50 formal presentations to inter alia SAIMEchE, SAIRAC, Frigair
Major Projects	: <b>Hilton Durban:</b> New air conditioning and ventilation systems for a 550-room hotel. : <b>Inkosi Albert Luthuli Central Hospital:</b> 1200 Bed Hospital; HVAC; SHEVS : <b>International Convention Centre Durban:</b> SHEVS : <b>V&amp;A Waterfront:</b> Basement Refurbishment; SHEVS + CO Extraction : <b>WEWORKS:</b> 155 West Street Sandton; Fire Curtains : <b>Botswana:</b> Botswana Innovation Hub Basement SHEVS + CO Extraction : <b>Ethiopia:</b> United Nations Head Office: Stair Pressurisation : <b>Mauritius:</b> Grand Baai Basement SHEVS + CO Extraction : <b>Namibia:</b> Several small projects under R 1m

---

## Andrew Leigh

Date of birth	: September 1960
Qualifications	: Matric
Career	: '80 – '04 <b>GEC Large Machines; Haggie Rand; Intech; WST</b>
	: 2004 – 12 <b>Wire Systems Technology.</b> Managing Director
	: 2013 – 13 <b>First Tech Group.</b> Divisional CEO
	: 2014 – 16 <b>Management Consultant.</b> Sole proprietor
	: 2016 – 18 <b>RVI Group.</b> CEO
	: 2019 - <b>Fire Serve (Pty) Ltd.</b> Commercial Director
Major Projects	: <b>Mall of Africa:</b> New Ventilation System; SHEVS : <b>Cahora Bassa Hydroelctrica:</b> New Ventilation System; SHEVS : <b>Menlyn Mall:</b> New Ventilation System; SHEVS : <b>WEWORKS:</b> 155 West Street Sandton; Fire Curtains : <b>Sasol HO;</b> Climate controlled, fully Automated Internal Shading System : <b>Discovery HO:</b> Climate controlled, fully Automated Internal Shading System : <b>Various:</b> Smaller projects : <b>Botswana:</b> Botswana Innovation Hub Basement; SHEVS + CO Extraction
